Session 1, Conceptual Performance Standards

Guidance:
- You will have approximately 1 hour for this discussion.
- A facilitator and note taker will be provided for each table.
- After each table has had the opportunity to answer these initial questions the table facilitator will share key thoughts/ideas and feedback with the larger group.
- Each table's facilitator will report out in 3-5 minutes the key ideas/thoughts from their group.
- Groups discussing the same species do not have to report on ideas if a previous group has already presented the same or very similar idea.
- All species summaries will be shared (example: 3 tables discussing cattle will all share) then opened up to remaining participants to comment and ask questions.

Questions:

1. Would these performance measures help achieve animal traceability? (If not, how would they need to be changed? What might better capture our expectations?)

2. What are other options for performance measures?

3. What is workable and what challenges or obstacles do they present?

4. How might States, Tribes, Industry, and USDA work together to resolve any challenges/obstacles?
